

## GoldHaven Engages Dahrouge Geological Consulting to Advance Evaluation of Smoke Mountain Property

Vancouver, British Columbia—(Newsfile Corp. – April 19, 2022) – GoldHaven Resources Corp. (CSE: GOH) (OTCQB: GHVNF) (FSE: 4QS) (“GoldHaven” or the “Company”) is pleased to announce that it has engaged Dahrouge Geological Consulting Ltd. to carry out a **30-day field program on GoldHaven’s Smoke Mountain** property located within the **Central BC porphyry-epithermal belt**. This program will consist of **mapping, sampling and prospecting** with the objective of advancing the project to drill-testing.

GoldHaven CEO, Justin Canivet states, “We are excited to work with Dahrouge to better understand the **2.5km-long-mineralization trend recently identified at Smoke Mountain**. This incredibly active polymetallic belt, which is **prospective for epithermal gold and silver**, continues to deliver high grade values. We are very pleased with what we saw from our phase 1 sampling program at Smoke Mountain, and we look forward to interpreting the results of this upcoming phase 2 field campaign.”

The Dahrouge crew will begin their campaign with **30 days of field work at the beginning of June**, and expect to be finished by late July. Sample analysis will take roughly another 2 months, depending on lab availability and capacity, after which GoldHaven management estimates the exploration team will be **ready to decide on potential drill testing targets in October of this year**.

Nathan Schmidt, Senior Geologist at Dahrouge Geological states, “We are excited to be working with GoldHaven at Smoke Mountain. We look forward to building on the promising results from the 2021 program and are confident that our team will maximize the chances of discovery.”

GoldHaven also announces that it has engaged **Eagle Mapping Services Ltd.** to **collect LiDAR data and aerial photography** of the Smoke Mountain property. This campaign will generate a high resolution digital elevation model (DEM), which will delineate potentially mineralized structures and other geological controls on hydrothermal alteration.

GoldHaven is also planning to conduct a **property-wide airborne magnetic/radiometric survey** at Smoke Mountain. Cost and timing quotes are currently being prepared by geophysical survey providers for a proposed 200m line-spaced program. The geophysical data from this survey will provide additional target layers toward a comprehensive exploration framework at Smoke Mountain.

## Smoke Mountain Overview

GoldHaven's Smoke Mountain is strategically located in the **Central British Columbia Porphyry-Epithermal Belt**, 15 km northeast of Surge Copper's Berg project, and 23 km north of Imperial Metals' Huckleberry project. In September 2021, a field crew carried out the Company's Phase 1 reconnaissance mapping, sampling and prospecting exploration program, which successfully outlined a **2.5 kilometre-long Cu-Au-Zn mineralization trend**.

**Figure 1.** The location of the Smoke Mountain property in the Central BC Porphyry-Epithermal Belt. Note, the mines, deposits, and prospects in this part of BC provide geologic context for the Smoke Mountain property, but this is not necessarily indicative that the Property hosts similar grades or tonnages of mineralization.

***About GoldHaven Resources Corp.***

GoldHaven Resources Corp. is a Canadian junior precious metals exploration Company focused on acquiring and exploring highly prospective land packages in both Canada and Chile. GoldHaven maintains a strategic presence in the gold and silver rich Maricunga Gold Belt of Northern Chile which is host to several mining and advanced exploration projects including Salares Norte (Gold Fields), Esperanza (Kingsgate Consolidated), La Coipa (Kinross), Cerro Maricunga (Fenix Gold), Lobo Marte (Kinross), Volcan (Volcan), Refugio (Kinross/Bema), Caspiche (Goldcorp/Barrick), and Cerro Casale (Goldcorp/Barrick). The Company has identified a total of 12 high-priority targets at it's Alicia and Roma project areas in the Maricunga within a prominent regional NW-SE structural trend along strike from Gold Field's Salares Norte deposit (5.2 million ounces of Gold<sup>1</sup>). These targets have been designated "High Priority" due to the extent, pervasive alteration, favourable geology, highly animals rock geochemical results, and their relative proximity to existing deposits. GoldHaven is also making exploration progress at its Smoke Mountain property (Canada) which is strategically located in the Central British Columbia Porphyry-Epithermal Belt in close proximity to Surge Copper's Berg project, as well as its Pat's Pond and O'Neill claims in Newfoundland's Central Newfoundland Gold Belt (Canada). Pat's Pond is strategically located in close proximity to Marathon Gold's Valentine Lake gold project and on strike from the Boomerang/Domino VMS deposit. Both project areas in Canada are highly prospective for gold, copper, silver and zinc and all project areas have large scale discovery potential.

### **Cautionary Statements Regarding Forward Looking Information**

*This news release contains forward-looking statements and forward-looking information (collectively, "forward looking statements") within the meaning of applicable Canadian and U.S. securities legislation, including the United States Private Securities Litigation Reform Act of 1995. All statements, other than statements of historical fact, included herein including, without limitation, the intended use of the proceeds received from the Offering, the possible acquisition of the Projects, the Company's expectation that it will be successful in enacting its business plans, and the anticipated business plans and timing of future activities of the Company, are forward-looking statements. Although the Company believes that such statements are reasonable, it can give no assurance that such expectations will prove to be correct. Forward-looking statements are typically identified by words such as: "believes", "will", "expects", "anticipates", "intends", "estimates", "plans", "may", "should", "potential", "scheduled", or variations of such words and phrases and similar expressions, which, by their nature, refer to future events or results that may, could, would, might or will occur or be taken or achieved. In making the forward-looking statements in this news release, the Company has applied several material assumptions, including without limitation, that investor interest will be sufficient to close the Offering, and the receipt of any necessary regulatory or corporate approvals in connection with the Offering and the Assignment, that there will be investor interest in future financings, market fundamentals will result in sustained precious metals demand and prices, the receipt of any necessary permits, licenses and regulatory approvals in connection with the future exploration and development of the Company's projects in a timely manner, the availability of financing on suitable terms for the exploration and development of the Company's projects and the Company's ability to comply with environmental, health and safety laws.*

*The Company cautions investors that any forward-looking statements by the Company are not guarantees of future results or performance, and that actual results may differ materially from those in forward-looking statements as a result of various factors, including, operating and technical difficulties in connection with mineral exploration and development activities, actual results of exploration activities, the estimation or realization of mineral reserves and mineral resources, the inability of the Company to obtain the necessary financing required to conduct its business and affairs, as currently contemplated, the inability to close the Offering, the inability of the Company to enter into definitive agreements in respect of the Letters of Intent which are the subject of the Assignment, the timing and amount of estimated future production, the costs of production, capital expenditures, the costs and timing of the development of new deposits, requirements for additional capital, future prices of precious metals, changes in general economic*

*conditions, changes in the financial markets and in the demand and market price for commodities, lack of investor interest in future financings, accidents, labour disputes and other risks of the mining industry, delays in obtaining governmental approvals, permits or financing or in the completion of development or construction activities, changes in laws, regulations and policies affecting mining operations, title disputes, the inability of the Company to obtain any necessary permits, consents, approvals or authorizations, including by the Exchange, the timing and possible outcome of any pending litigation, environmental issues and liabilities, and risks related to joint venture operations, and other risks and uncertainties disclosed in the Company's latest interim Management's Discussion and Analysis and filed with certain securities commissions in Canada. All of the Company's Canadian public disclosure filings may be accessed via [www.sedar.com](http://www.sedar.com) and readers are urged to review these materials.*

*Readers are cautioned not to place undue reliance on forward-looking statements. The Company undertakes no obligation to update any of the forward-looking statements. The Company undertakes no obligation to update any of the forward-looking statements in this news release or incorporated by reference herein, except as otherwise required by law.*
